

EDINBURGH NAPIER UNIVERSITY

SCHOOL OF COMPUTING

PROJECT DIARY

Student: Andrew Rocke

Supervisor: Petros Karadimas

Date: 10/02/2025

Last diary date: 16/01/2025

Objectives:

Snort model

Training and recording different models

Meeting with supervisor

Progress:

Identified snort model evaluation would not work with current versions of Snort, so researched and found SnortML docker model, ran example to collect results and use for justifications in the thesis.

Issues exporting model to TFlite

Tunning of model and collation of results

Meeting with supervisors, given guidance on using equations and use of figures, also on direction of writing the thesis that was taken on board.

Supervisor's Comments:
